

DO YOU REALLY WANT TO CLIMB ACONCAGUA?

- ✍ It is a two to three week expedition involving long flights to get there.
- ✍ It is a very demanding expedition and one can frequently feel totally miserable with the austere and extreme conditions.

- ✍ Load carrying is no joke and you will be expected to carry at least 40lbs - maybe more. Try that at altitude - it's brutal!
- ✍ The winds can reach over 100mph and you can be stuck in your tent for days in storms that are as severe as the weather on Everest.
- ✍ You risk not only altitude sickness but also frost-bite.
- ✍ The food above base camp comprises monotonous expedition rations.
- ✍ The walk off is harder than you can imagine.
- ✍ Many climbers fail to reach the summit.

WHAT!!!! You still want to go??!!!! Well then contact Gane and Marshall and we shall send you the information or you can speak to Jeremy Gane who has experienced Aconcagua's Vacas-Relinchos Route.
